

# *Statistical Release*

26 March 2009

## **COUNCIL TAX LEVELS SET BY LOCAL AUTHORITIES IN ENGLAND – 2009-10**

- The average Band D council tax set by local authorities in England for 2009-10 will be £1,414 compared with £1,373 in 2008-09. This equates to an average increase between 2008-09 and 2009-10 of 3.0%, the lowest increase for 15 years.
- In England in 2009-10, the average council tax per dwelling will be £1,175 compared with £1,145 in 2008-09, an increase of 2.6%.
- The average Band D council tax will be £1,308 in London, £1,372 in metropolitan areas and £1,453 in shire areas.
- Parish precepts in 2009-10 will total £340 million. This represents an increase of 5.8% over the 2008-09 figure of £322 million.
- The total tax base used for setting council taxes for 2009-10 was 18.1 million Band D equivalent dwellings. This represents an increase of 0.5% over the figure of 18.0 million for 2008-09 and is the lowest increase since 1995-96.

This release provides information on council tax levels and associated information for the financial year 2009-10, and changes over 2008-09. This information is derived from Budget Requirement (BR) forms submitted by all 326 billing authorities and all 95 major precepting authorities in England. These billing authorities include the nine unitary authorities that come into existence from 1 April 2009. The release has been compiled by the Local Government Finance – Analysis and Capital Finance division of Communities and Local Government.

## Council tax levels set by local authorities in England – 2009-10

1. This statistical release reflects the position for the year 2009-10 and includes data for the nine unitary authorities that come into existence on 1 April 2009. Full details of these new authorities, and the authorities they replace, can be found in the background notes at the end of this release.
2. Unless otherwise stated, all percentage change figures in this release that relate to restructuring assume that the same structure for 2009-10 was also in existence in 2008-09. For example, to ensure comparable data for the new unitary authorities, the corresponding 2008-09 district and county figures have been aggregated.
3. Council tax can be measured in 'Band D' or in 'per dwelling' terms. Band D has historically been used as the standard for comparing council tax levels between and across local authorities, as this measure is not affected by the varying distribution of properties in bands that can be found across authorities. Additionally, the number of Band D equivalent dwellings are collected at around the same time that the council tax levels are set by the local authority, whereas the 'per dwelling' calculation uses chargeable dwellings figures that are captured some five months in advance of setting council tax levels. The Band D measure therefore better reflects the latest position.
4. **Table 1** gives figures for levels of, and changes in, the average Band D council tax and the average council tax per dwelling for the last 10 years. These figures include parish precepts, whereas figures excluding parish precepts are shown in **Table 5**. Figures in this release are shown in pounds whilst percentage changes are calculated on figures expressed to the nearest penny.

- The average Band D council tax set by local authorities in England for 2009-10 will be £1,414 compared with £1,373 in 2008-09. This equates to an average increase between 2008-09 and 2009-10 of 3.0%, the lowest increase for 15 years.
- In England in 2009-10, the average council tax per dwelling will be £1,175 compared with £1,145 in 2008-09, an increase of 2.6%.

**Table 1: Average council tax and % change 2000-01 to 2009-10<sup>(a)</sup>**

	Band D for area		Average per dwelling	
	£	% change	£	% change
2000-01	847	6.1	697	6.3
2001-02	901	6.4	741	6.3
2002-03	976	8.2	804	8.5
2003-04	1,102	12.9	908	12.9
2004-05	1,167	5.9	967	6.5
2005-06	1,214	4.1	1,009	4.3
2006-07	1,268	4.5	1,056	4.7
2007-08	1,321	4.2	1,101	4.3
2008-09	1,373	3.9	1,145	4.0
2009-10	1,414	3.0	1,175	2.6

Sources: BR and CTB forms

(a) Figures include parish precepts.

5. The average council tax per dwelling is lower than the average Band D council tax. This is mainly because, in England as a whole, most dwellings are in bands A to C and account for almost two-thirds of all dwellings. Further details on this can be found in paragraph 6 of the Background Notes to this release.
6. Generally, the increase in the average council tax per dwelling is higher than the increase in the average Band D council tax. This is largely because the percentage increase in the tax base (the denominator for the average Band D measure) is greater than the percentage increase in the number of chargeable dwellings (the denominator for the average per dwelling measure). However, this year the converse has occurred – the percentage increase in tax base is lower than the percentage increase in chargeable dwellings. This has led to the increase in average council tax per dwelling being lower than that for the average Band D.
7. **Chart A** shows the changes in average Band D council tax since 2000-01.

**Chart A: Average Band D council tax % change 2000-01 to 2009-10<sup>(a)</sup>**

(a) Figures include parish precepts

8. **Table 2** gives the average Band D council tax levels and percentage changes for London, metropolitan areas and shire areas for the last five years.

- The average Band D council tax will be £1,308 in London, £1,372 in metropolitan areas and £1,453 in shire areas.
- The increase for shire areas of 3.3% is the lowest increase since council tax was introduced; the increase for metropolitan areas of 3.3% and the increase for the London area of 1.3% are the lowest increases in council tax in these areas since 1994-95.

**Table 2: Average Band D council tax and % change by area of authority 2005-06 to 2009-10<sup>(a)</sup>**

	London area		Metropolitan areas		Shire areas <sup>(b)</sup>	
	£	% change	£	% change	£	% change
2005-06	1,162	3.8	1,190	4.1	1,234	4.1
2006-07	1,214	4.5	1,237	3.9	1,290	4.6
2007-08	1,258	3.6	1,284	3.8	1,348	4.4
2008-09	1,292	2.7	1,328	3.4	1,406	4.3
2009-10	1,308	1.3	1,372	3.3	1,453	3.3

(a) Figures include parish precepts.

(b) Figures include unitary authorities.

9. **Table 3** gives a breakdown of the funding of budgeted net revenue expenditure for England for 2007-08 to 2009-10. This information is reported as at the time local authorities set their budgets and was reported to Communities and Local Government by the authorities on their BR forms.

- Local authority budget requirements including parish precepts in 2009-10 will total £54.0 billion.
- Parish precepts in 2009-10 will total £340 million. This represents an increase of 5.8% over the 2008-09 figure of £322 million.
- The council tax requirement in 2009-10 will total £25.6 billion which represents an increase of 3.5% over the 2008-09 figure of £24.8 billion.
- Local authorities have budgeted to use £1.9 billion from reserves during 2009-10. This figure is 37% higher than the £1.4 billion reported on the 2008-09 BR forms; some 41% of the use of reserves (£0.8 billion) is due to be used for Transport for London which is part of the Greater London Authority.
- The total tax base used for setting council taxes for 2009-10 was 18.1 million Band D equivalent dwellings. This represents an increase of 0.5% over the figure of 18.0 million for 2008-09 and is the lowest increase since 1995-96.

**Table 3: Budgeted local government net revenue expenditure: England summary 2007-08 to 2009-10**

Source: BR and CTB forms

(a) For the City of London, figures include income from an offset of £9.8m and its rate premium income of £5.6m.

(b) Amounts transferable from a billing authority's general fund to the collection fund are positive; amounts transferable in the opposite direction are negative.

10. **Table 4** shows both the levels and the annual percentage changes in the average Band D council tax and the average council tax per dwelling by area and Government Office region.

- The average Band D council tax in each region for 2009-10 varies from £1,308 in London to £1,479 in the North East.
- The percentage increase in the average Band D council tax in each region for 2009-10 varies from 1.3% in London to 3.5% in the North East and South West.
- The average council tax per dwelling varies from £1,027 in Yorkshire and the Humber to £1,346 in the South East.

**Table 4 : 2009-10 Council tax (average Band D and average per dwelling)<sup>(a)</sup> and % change: by area**

	Average Band D council tax for area of billing authority		Average council tax per dwelling in the area	
	£	% change	£	% change
<b>ENGLAND</b>	<b>1,414</b>	<b>3.0</b>	<b>1,175</b>	<b>2.6</b>

Sources: BR and CTB forms

(a) Figures include parish precepts.

(b) Figures include unitary authorities.

11. **Table 5** shows for England as a whole and class of authority, council tax expressed in terms of average Band D council tax, both excluding and including parish precepts where they exist. Figures are also given for the percentage change over each class of authority's figure for 2008-09.
12. In addition, columns 5 and 6 of **Table 5** show the average area Band D council tax for 2009-10 and the percentage change over the corresponding figure for 2008-09. This definition differs from the Band D figures in columns 1 to 4 in that it also includes

the council taxes for the other authorities providing services in the authority's area. The final two columns of **Table 5** show the average council tax per dwelling within the area.

13. All percentage change figures assume that the same structure for 2009-10 was also in existence in 2008-09. Where a class is affected by restructuring, these figures may differ from the percentage change when comparing the Band D figure that was published in 2008-09 to that for 2009-10. See Example C for a worked example.

- The average increase in Band D council tax in England including parish precepts is 3.0%; when parish precepts are excluded, the increase is 2.9%.
- The average council tax increase in London boroughs, including the Greater London Authority precept, is 1.3%; the increase is 1.7% excluding the Greater London Authority precept.
- The highest percentage increase in average council tax is for Metropolitan and Shire police authorities at 4.6% over their 2008-09 figure; the lowest increase for a class is no change for the Greater London Authority (the Metropolitan police authority decreased by 1.2%)
- The average increase for all shire unitary authorities (including parishes) is 3.3%, assuming that the new unitary authorities created on 1 April 2009 were also in existence in 2008-09.
- The average increase for the nine new authorities created on 1 April 2009 (including parishes) is 2.5%, when compared to corresponding 2008-09 district and county aggregate figures.
- The Greater London Authority's Band D council tax again includes £20 to cover the precept for the 2012 Olympic Games.

**Table 5 : 2009-10 Council tax (average Band D and average per dwelling) and % change: by class of authority**

Sources: BR and CTB forms

(a) Figures include parish precepts.

(b) This includes Transport for London (TfL), London Development Agency (LDA), London Fire and Emergency Planning Authority (LFEPA) and Metropolitan Police Authority.

(c) Percentage change figures assume that the new unitary authorities created on 1 April 2009 were also in existence in 2008-09. To allow meaningful comparisons, the corresponding 2008-09 district and county figures have been aggregated.

(d) Percentage change figures exclude those authorities that were disbanded on 31 March 2009 (as part of the establishment of nine new unitary authorities) from 2008-09 and 2009-10 data. This ensures that data are comparable.

(e) Includes Metropolitan Police Authority element from GLA, but excludes City of London Police (as this element is not distinguishable from the amount paid to the City of London).

(f) Excludes fire and rescue services provided by counties, unitaries and the GLA.

## **Additional tables**

There are three additional tables produced for all authorities that are not included in the printed version of this release owing to their size. They are available on the Department's website and can be found at: [www.local.communities.gov.uk/finance/ctax/ctax0910.htm](http://www.local.communities.gov.uk/finance/ctax/ctax0910.htm)

Below is a brief description of the data contained in the tables:

- **Table 6** is similar to **Table 5** but shows details at local authority level;
- **Table 7** shows the average area council tax for a dwelling occupied by two adults in each local authority area, for each council tax band;
- **Table 8** shows some of the data used by billing and major precepting authorities in calculating their council tax for 2009-10. The data are taken from the Budget Requirement (BR) forms supplied by local authorities in England to Communities and Local Government. The table also shows details of the number of chargeable dwellings in each authority taken from the CTB forms. Totals are also shown for England, regions and class of authority.

## **Worked examples:**

The data in **Table 8** can be used to calculate other figures in this release:

### **Example A – Average council tax for Brentwood excluding parish precepts (Band D)**

Council tax requirement	£5,624,576
<i>less</i>	
Parish precepts:	<u>£240,260</u>
<i>equals</i>	£5,384,316
<i>divided by</i>	
Council tax base:	31,772
<b><i>equals:</i></b>	<b>£169.47</b>

### **Example B – Average council tax per dwelling in the South West:**

Council tax requirement	£2,809,880,557
<i>divided by</i>	
Chargeable dwellings:	2,258,257
<b><i>equals:</i></b>	<b>£1,244.27</b>

All published figures are as reported by the authority on their BR forms and may vary slightly when the formulae above are used.

### **Example C – Comparing class figures with those in 2008-09**

Where a class has been affected by restructuring, it is not meaningful to make a comparison between the Band D figure that was published in 2008-09 and that for 2009-10. Instead, the figures in Table 5 have assumed that the same structure for 2009-10 was also in existence in 2008-09 so as to produce percentage change figures on a like for

like basis. The most noticeable example of this is for the class of unitary authorities, as demonstrated below:

	<b>08-09 Band D including parishes</b>	<b>09-10 Band D including parishes</b>	<b>change</b>
Unitary authorities in existence in both years	£1,148	£1,190	3.7%
Unitary authorities created on 1 April 2009 <sup>1</sup>	£1,249	£1,280	2.5%
All unitary authorities, assuming that those created on 1 April 2009 were also in existence in 2008-09 <sup>1</sup>	£1,177	£1,216	3.3%

### **Terminology used in this release**

A list of terms relating to local government finance is given in the glossary at Annex G to *Local Government Financial Statistics England No. 18 2008*. This is accessible at <http://www.local.communities.gov.uk/finance/stats/lgfs/2008/index.htm>. The most relevant terms for this release are defined below.

**Area council tax** - the average total amount of council tax payable for a Band D dwelling occupied by two adults within a billing authority's area. It is the sum of the amounts requested: a) by the billing authority; b) by major precepting authorities covering the billing authority's area; and c) by parish or town councils within the billing authority's area. The amount at c) is the total amount requested by parish and town councils, averaged across the whole of the billing authority's area.

**Average council tax per dwelling** – the total council tax payable in an area divided by the total number of chargeable dwellings in the area.

**Band D council tax** – this is the council tax payable on a Band D dwelling occupied as a main residence by two adults, before any reductions due to discounts, exemptions or council tax benefit. This definition is widely regarded as a benchmark when comparing council tax levels in different areas or over time.

**Billing authority** - a local authority empowered to set and collect council taxes, and manage the Collection Fund, on behalf of itself and the other local authorities in its area. In England, shire and metropolitan districts, the Council of the Isles of Scilly, unitary authorities, London Boroughs and the City of London are billing authorities.

**Budget requirement** - an amount calculated, in advance of each year, by each billing authority, by each major precepting authority and by each parish or town council. It is broadly the authority's estimated net revenue expenditure allowing for changes in reserves. It is, in other words, an estimate of the amount to be met from revenue support grant, redistributed non-domestic rates, principal formula police grant, GLA general grant and council tax.

---

<sup>1</sup> Band D figures for the unitary authorities created on 1 April 2009 were produced for 2008-09 by aggregating corresponding district and county figures.

**Budget Requirement (BR) forms** – a return completed by all billing and precepting authorities in England giving details of how their council tax requirement is calculated and what council tax a Band D two-adult dwelling should pay.

BR1 forms are completed by billing authorities, BR2 forms by precepting authorities and the BR3 form is completed by the Greater London Authority.

**Chargeable dwellings** - domestic dwellings in an area for which council tax is payable. It excludes dwellings on the valuation list which are exempt. Each chargeable dwelling is counted as one dwelling, whether or not a full council tax bill is payable for it. The total number of chargeable dwellings in an area is the denominator used to calculate the average council tax per dwelling.

**Collection Fund** - the fund administered by a billing authority into which council taxes are paid, and from which payments were made to the general fund of billing and precepting authorities.

**Council tax** - a local charge (or charges) set by the billing authority and precepting authorities in order to collect sufficient revenue to meet their demand on the collection fund. It replaced the community charge on 1 April 1993 and is based on the value of the dwelling and the number of residents. The Valuation Office Agency assesses the dwellings in each district area and assigns each dwelling to one of eight valuation bands, A to H. The tax is set on the basis of the number of Band D equivalent dwellings. Tax levels for dwellings in other bands are set relative to the Band D baseline.

**Council tax base** - the number of Band D equivalent dwellings in a local authority's area. To calculate the tax base for an area, the number of dwellings in each band in the area is reduced to take account of discounts and exemptions. The resulting figure for each band is then multiplied by its proportion relative to Band D (see paragraph 6 in Background Notes) and the total across all eight bands is calculated.

The tax base figure that is taken into account by a local authority when it sets its council tax is often called the **tax-setting tax base**. This is not the same as the tax base that is used in the calculation of entitlement to formula grant, although the definitions are similar. The differences relate to:

- their timing;
- the fact that the tax-setting tax base is based on an assumed collection rate of under 100%, whereas 100% is assumed for the tax base for formula grant purposes; and
- the fact that the tax-setting tax base is based on the actual discount for second homes, whereas a discount of 50% is assumed for the tax base for formula grant purposes.

**Council tax requirement** - an amount calculated, in advance of each year, by each billing authority and by each major precepting authority. It is the amount of revenue to be met from council tax, and is equivalent to an authority's Band D council tax multiplied by its tax base.

**CTB form** - a return completed by all billing authorities in England giving details of the number of dwellings in an area, including those subject to discounts or exemptions from

council tax. It is used in calculating the council tax base figure for formula grant purposes and the average council tax per dwelling.

**Designation** - when the government limits a local authority's budget requirement and hence its council tax.

**Major precepting authority** - county councils, metropolitan police authorities, metropolitan fire and rescue authorities, shire police authorities, combined fire and rescue authorities and the Greater London Authority. These are some of the local authorities which make a precept on the collection fund.

**Net revenue expenditure** - represents spending funded by the budget requirement or the use of reserves.

**Olympic precept** - a precept on all dwellings liable for council tax within the Greater London Authority area to cover the cost of the 2012 Olympic Games. The precept was introduced in 2006-07 and has been set at £20 per Band D dwelling for each year.

**Parish precepts** - the amount of council tax collected by a billing authority for parish or town councils within its area. Parishes are also known as local precepting authorities.

### **Data quality**

The information in this release is based on data returned to Communities and Local Government by English local authorities on Budget Requirement (BR) forms. The data are collected using legislative powers that require all precepting and billing authorities to return completed forms within seven days of the calculation and council agreement of an authority's budget requirement for the coming year. This effectively ensures a 100% response rate before the release is compiled.

Two of the key financial aggregates reported on the form (budget requirement and council tax requirement) are fixed once reported on an authority's BR form and cannot, except in certain exceptional circumstances (e.g. when they are designated and required to recalculate their budget requirement), be varied during the year. Consequently, local authorities have a very strong financial incentive to report accurate figures on the BR forms. The form also has to be signed by the Chief Finance Officer of the authority.

Figures are subjected to rigorous pre-defined validation tests both whilst the form is being completed by the authority (within the form itself) and also in Communities and Local Government as the data are received and stored.

The release document, once prepared, is also subject to intensive peer review before being cleared as fit for the purposes of publication.

### **Uses made of the data**

The data in this Statistical Release are used to inform government policy on council tax. The council tax requirement figure for 2009-10 is also used to estimate accrued council tax for the Office for National Statistics which is used in the Public Sector Finances statistics and the National Accounts.

## **Background Notes**

1. For press inquiries about this Statistical Release please contact the Local Government press desk on 020 7944 3042 or email [press.office@communities.gsi.gov.uk](mailto:press.office@communities.gsi.gov.uk). For other inquiries please telephone John Farrar on 020 7944 4158 or email [br.statistics@communities.gsi.gov.uk](mailto:br.statistics@communities.gsi.gov.uk).
2. Following local government reorganisation, nine unitary authorities will come into existence from 1 April 2009. The nine new authorities will replace seven county councils and 37 shire district councils. The data for these new authorities are included in this release.

Details of the new authorities and those they replace are as follows:

### **Bedford UA**

Bedfordshire County Council (part), Bedford

### **Central Bedfordshire UA**

Bedfordshire County Council (part), Mid Bedfordshire, South Bedfordshire

### **Cheshire East UA**

Cheshire County Council (part), Congleton, Crewe & Nantwich, Macclesfield

### **Cheshire West & Chester UA**

Cheshire County Council (part), Chester, Ellesmere Port & Neston, Vale Royal

### **Cornwall UA**

Cornwall County Council, Caradon, Carrick, Kerrier, North Cornwall, Penwith, Restormel

### **Durham UA**

Durham County Council, Chester-le-Street, Derwentside, Durham City, Easington, Sedgefield, Teesdale, Wear Valley

### **Northumberland UA**

Northumberland County Council, Alnwick, Berwick-upon-Tweed, Blyth Valley, Castle Morpeth, Tynedale, Wansbeck

### **Shropshire UA**

Shropshire County Council, Bridgnorth, North Shropshire, Oswestry, Shrewsbury & Atcham, South Shropshire

### **Wiltshire UA**

Wiltshire County Council, Kennet, North Wiltshire, Salisbury, West Wiltshire

3. Should they wish to do so, new authorities have been given the flexibility to set separate basic amounts of council tax in each of their predecessor areas, under the following conditions:

(i) for each financial year, the difference between the Band D amount for each non-principal predecessor area and the principal area<sup>2</sup> (excluding special items), is less than the difference between the Band D amount calculated by the billing authority for each non-principal predecessor area and the principal area in the previous year;

(ii) when a non-principal predecessor area's Band D amount equals that of the principal area, the aggregate area becomes the principal area in future financial years.

(iii) the unitary authority must ensure that the Band D amount is the same across the whole of its area no later than 1 April 2014.

4. Full details of these regulations are available under Part 4 of the Local Government (Structural Changes) (Finance) Regulations 2008 ('the 2008 Regulations').
5. Council taxes are set by each authority that receives formula grant (i.e. both billing authorities such as district councils and London boroughs, and major precepting authorities such as county councils, fire and rescue authorities and the Greater London Authority). The billing authority's council tax may also include an amount used to finance parish or town councils (known as parish precepts). Council taxes for all authorities providing services in an area appear on one council tax bill issued by the billing authority.
6. There are eight council tax bands: bands A to H. How much council tax each household pays depends on the value of the dwelling concerned, as estimated in the 1991 dwelling valuation exercise or referenced to 1991 values. The bands and the percentage of dwellings in each band as a percentage of the England total are:

<b>Band</b>	<b>Value of dwelling (estimated at April 1991)</b>	<b>Proportion of the tax due for a Band D dwelling</b>	<b>% of total dwellings in England as at 15 September 2008</b>
A	£40,000 and under	6 / 9	25
B	£40,001 - £52,000	7 / 9	19
C	£52,001 - £68,000	8 / 9	22
D	£68,001 - £88,000	9 / 9	15
E	£88,001 - £120,000	11 / 9	10
F	£120,001 - £160,000	13 / 9	5
G	£160,001 - £320,000	15 / 9	4
H	Over £320,000	18 / 9	1

7. Band D is used as the basis for calculating the tax base (the number of Band D equivalent dwellings) and for year-on-year comparisons of tax levels set. However, as only a minority of dwellings in each local authority are in Band D. Average council tax per dwelling reflects the wide variation between authorities in the distribution of dwellings across bands. Although, this is a helpful measure to use when comparing the amounts payable in different areas, the calculation requires using chargeable dwellings figures that are captured some five months in advance of setting council tax levels. Variations between council tax per dwelling figures are due to a combination

<sup>2</sup> The "principal area" is the predecessor area with the highest band D figure as calculated by the billing authority for the area for the base year.

of local authority tax-setting decisions and the distribution of dwellings across bands within each authority's area.

8. Further information is also available on the department's website at [www.local.communities.gov.uk/finance/Ct.htm](http://www.local.communities.gov.uk/finance/Ct.htm). In particular, spreadsheets under *Council Tax Time Series* give average Band D and per dwelling figures for each authority, region and class of authority since council tax was introduced in 1993-94.
9. For a fuller picture of recent trends in local government finance, readers are directed to *Local Government Financial Statistics England No. 18 2008* which is available in hard copy from Wetherby Publications Centre at [communities@twoten.com](mailto:communities@twoten.com) (Tel. 0870 1226 236) and electronically from the Communities and Local Government website: <http://www.local.communities.gov.uk/finance/stats/lgfs/2008/index.htm>
10. Both the Scottish Government and the Welsh Assembly Government also collect council tax data. Their information can be found at the following websites:

Scotland:

<http://www.scotland.gov.uk/Topics/Statistics/Browse/Local-Government-Finance/DatasetsCouncilTax>

Wales:

<http://new.wales.gov.uk/topics/statistics/theme/loc-gov/ctlevels/?lang=en>

#### **Symbols and convention used in this release**

...	=	not available
–	=	not relevant
-	=	negative
0	=	zero or negligible

#### **Rounding**

Where figures have been rounded, there may be a slight discrepancy between the total and the sum of constituent items
